

14 Series chandelier, 2005

Designer: **Omer Arbel**

Manufacturer: **Bocci**

£2,200

DESCRIPTION

14 Series chandelier by **Omer Arbel** for **Bocci**.

Bocci uses glass blowing and glass, ceramics and metal sand-casting to produce their unique, hand-crafted lights.

The 14 series chandelier is formed from articulated cast glass hemispheres with a frosted cylindrical void that houses a low voltage or LED lamp. Individual pendants are visually quite subtle but gain tremendous strength when multiplied and clustered in large groups.

Chandeliers come in clusters of 5, 7, 14, 26 and 36 pendants. The light interacts with the imperfections, rifts, bruises and bubbles of the cast glass to make a rich halo of light. Because cast glass is an organic process - hand-crafted and imperfect by nature - each piece produced is unique.

5 and 7 lamp chandeliers have a round, brushed nickel canopy. They use strain relief connections, which allow the pendant lengths to be adjusted on site.

14, 26 and 36 lamp chandeliers have a round, white powder-coated canopy. Pendant lengths are pre-set during production and are not site adjustable. The shortest and longest lengths must be specified when ordering (please

add a note to your order). The pendants come as standard with 3m of coaxial cable.

Other canopy options are available, please **enquire** for details.

The 14 series light is also available as a **single pendant** or in a **cluster of three** pendants.

Please refer to downloadable PDFs for further information.

IP30 rated.

DIMENSIONS

Individual sphere: 10.2dia x 10.2cmh
