DESCRIPTION

356 Bedside

Unit by **Pauline Deltour** for **Fucina**.

The 356 series of cabinets designed by Pauline Deltour is inspired by curves seen in the automotive industry. The body of the units is purely functional, whilst the doors become a façade, oversailing the case and folding to become tactile handles with subtle personality.

The 356 bedside unit features one door with external hinges and feet with a slight flare. The family of three sizes reflect different uses within the home and office.
