

73.1V Single Pendant

Manufacturer: **Bocci**

£933

DESCRIPTION

73.1V single pendant by Bocci.

Bocci uses glass blowing and glass, ceramics and metal sand-casting to produce their unique, hand-crafted lights.

Based on the 73 series, the 73V expands on this technique and features an oblong shape and unique gradient shade. The 73V is the result of blowing molten glass into a folded, heat-resistant ceramic fabric. The final form is textural and retains that fabric connection in its solid form. The top of each pendant has a light source placed encouraging a gradient of colour when turned on.

73.1V is a low voltage blown-glass single pendants with each being hand-blown into a folded and highly heat-resistant ceramic fabric vessel. Due to the cast glass organic process - hand-crafted and imperfect by nature - each piece produced is unique.

Please refer to downloadable PDFs for further information.

DIMENSIONS

Standard shallow canopy: 11.6cm diameter

Standard deep canopy: 11.6cm diameter

Mini canopy: 3cm diameter

Mini innie canopy: 8.8cm diameter

Mini outie canopy: 3.8cm diameter

MATERIALS
