

73T Table Light

Manufacturer: **Bocci**

£747

DESCRIPTION

73T table light by **Bocci**.

Bocci uses glass blowing and glass, ceramics and metal sand-casting to produce their unique, hand-crafted lights.

The 73 series is the result of blowing molten glass into a folded, heat-resistant ceramic fabric. The final form is textural and retains that fabric connection in its solid form. Each pendant is filled with a light source encouraging a diffused light.

73T is a table light with a blown-glass single pendant, hand-blown into a folded and highly heat-resistant ceramic fabric vessel. It features an integral dimming system within a brass cylinder. The black fabric cord is semi-rigid and can be adjusted to create a form. It can also be hung on a wall by the small notch beneath the brass stand.

Due to the cast glass organic process - hand-crafted and imperfect by nature - each piece produced is unique.

Please note: The brass base and dial control are untreated and, as such, will develop a natural patina over time.

Refer to downloadable PDFs for further information.

DIMENSIONS

7.5cm diameter base with a 229cm long, flexible cable.

MATERIALS

Hand blown glass into a folded and highly heat-resistant ceramic fabric vessel, black flexible cord with brass base and dial control.

Bulb (**included**): 1.8w LED.
