

73V Series Pendant

Manufacturer: **Bocci**

£2,800

DESCRIPTION

73V Series pendant by **Bocci**.

Bocci uses glass blowing and glass, ceramics and metal sand-casting to produce their unique, hand-crafted lights.

Based on the 73 series, the 73V expands on this technique and features an oblong shape and unique gradient shade. The 73V is the result of blowing molten glass into a folded, heat-resistant ceramic fabric. The final form is textural and retains that fabric connection in its solid form. The top of each pendant has a light source placed encouraging a gradient of colour when turned on.

73.7V is a low voltage arrangement of blown-glass in random clusters of 3, 5 and 7 pendants. Each pendant is hand-blown into a folded and highly heat-resistant ceramic fabric vessel.

Pendants come in random clusters of 3, 5 and 7 pendants. Due to the cast glass organic process - hand-crafted and imperfect by nature - each piece produced is unique.

Please refer to downloadable PDFs for further information.

DIMENSIONS

73.3V: 15.2cm diameter canopy
73.5V and 73.5V: 20.3cm diameter canopy

MATERIALS

Hand blown glass into a folded and highly heat-resistant ceramic fabric vessel, 3, 5 and 7 lamp pendants have a round, brushed nickel canopy.

Bulb (**included**): Each pendant is housed with a 10 watt xenon lamp.

LED option also available; please **enquire** for more information.
