

73V Series Pendant

Manufacturer: **Bocci**

£2,520

DESCRIPTION

73V Series Pendant by **Bocci**.

The 73V Pendant from Bocci showcases their expertise in glass blowing, ceramics, and metal sand-casting to create one-of-a-kind, hand-crafted lights.

Created by blowing molten glass into a folded, heat-resistant ceramic fabric, the final form is textural and retains the material properties but in a solid form. The top of each pendant has a light source that produces a gradient of colour when turned on.

73V is a low-voltage arrangement of blown glass in random clusters of 3, 5, and 7 pendants. Due to the organic making process, each piece is unique.

DIMENSIONS

73.3V: 15.2cm diameter canopy.

73.5V and 73.5V: 20.3cm diameter canopy.

MATERIALS

Hand blown glass with a white, black or brushed nickel canopy.

Bulb (**included**): Each pendant is housed with a 10 watt xenon lamp.

LED option also available; please **enquire** for more information.

Please note: This is a CE-approved product and should only be used in countries that accept and adhere to this standard. If used in other countries, it will be the sole responsibility, risk and liability of the customer.
