

## 28 Random Pendant

Designer: **Omer Arbel**

Manufacturer: **Bocci**

£2,432

### DESCRIPTION

**28 Random light** by **Omer Arbel** for **Bocci**.

Designed in 2005, the 28 series pendants are made using a complex glass blowing technique in which air pressure is intermittently introduced into and then removed from a glass matrix. The result is a distorted spherical shape with a composed collection of inner shapes, one of which is made of opaque milk glass and houses a low voltage (12V 20W xenon) lamp.

28 random light is suspended using coaxial cable and composed in ambient groupings.

The 28 random light is available in three different configurations. Please **enquire** for details of other configurations available.

Bocci's **28 series configurator** may be used to explore the different combinations of colour and pendants available within the 28 series.

IP40 rated.

## DIMENSIONS

28.3 Random light:

3 x Glass spheres: 15.24cm diameter
