

## 28 Cluster Pendant

Designer: **Omer Arbel**

Manufacturer: **Bocci**

£2,432

### DESCRIPTION

**28 cluster pendant by Omer Arbel for Bocci.**

Individual 28 series pendants are made using a complex glass blowing technique whereby air pressure is intermittently introduced into and then removed from a glass matrix. The result is a distorted sphere with a composed collection of inner shapes, one of which is made of opaque milk glass and houses a low voltage (12V, 20Watt xenon) lamp.

28 series pendants, designed in 2005, cluster together in hexagonal shapes, which nestle into one another to create patterns as dictated by the needs of the interior. They may also be used on their own or clustered in an ambient manner similar to their distant cousins the 14.

Please see the downloadable PDF for full specification.

**Please note:** the price given is for spheres in clear glass in a cluster formation.

Other options are available against a surcharge: coloured spheres, LED bulbs and random formations with spheres hanging at different heights. Please enquire for more information.

Details of the additional colours available can be viewed on the downloadable specification sheet.

Bocci's **28 series configurator** may be used to explore the different combinations of colour and pendants available within the 28 series.

The series 28 pendant light is also available as a **single pendant** or in a cluster formation of **3 spheres**.

IP40 rated.

## DIMENSIONS

Individual sphere: 16.5dia x 16.5cmh

## MATERIALS

Blown glass using air pressure.

Bulb (**included**): Halogen / Xenon 12V 20W
