

Key Toggle

£33

DESCRIPTION

Key Toggle by **Campbell Cole**.

The Key Toggle by Campbell Cole is a pleasingly sculptural leather keyring, designed with the purpose of reducing leather wastage during production.

A single layer of leather is wrapped over itself to form the small toggle shape, whilst the nylon loop at the top allows the keys to be hung from a hook at home - making keys a little harder to lose.

Over time, handling it causes the leather to develop a subtle sheen and slightly darken.

MATERIALS

Made from full grain Italian vegetable tanned leather, with a branded steel split ring and a nylon paracord hanging loop. Packaged in a Campbell Cole gift box.
