Designer: **Hans Wegner**

Manufacturer: **Carl Hansen and Son**

DESCRIPTION

CH26 armchair by **Hans Wegner** for **Carl Hansen & Son**.

Designed in 1950, the CH26 has a strong affinity with the CH22, the first chair in the exclusive collection that Hans Wegner designed for Carl Hansen and Son. It was also designed alongside such classics as the **CH24** (popularly known as the Wishbone chair) and the **CH25 lounge chair**.

Now produced for the first time by Carl Hansen, the elegant lines and subtle organic curvature of this deceptively simple chair eloquently express Wegner's mastery of design and construction in wood.

The newly-produced CH26 is manufactured to Wegner's original specifications, with solid wood construction and handwoven papercord seat. The backrest is made from form-pressed wood veneer, with distinctive oblong cover caps concealing the joint between the chair back and the frame. The corners of the seat frame are precisely finger-jointed and the papercord seat is envelope woven.

DIMENSIONS

MATERIALS

The cover cap in the backrest may be selected in either oak or walnut to blend in with the backrest or stand in clear contrast as a design detail that emphasises the construction method.
