

## 412 Cab Chair

Designer: **Mario Bellini**

Manufacturer: **Cassina**

£1,471

### DESCRIPTION

**412 Cab chair** by **Mario Bellini** for **Cassina**.

Bellini's Cab chair, designed in 1977, consists of a leather cover stretched over a minimal tubular steel frame inspired by how our skin fits over our skeleton. The only additional reinforcement is provided by a plastic plate that supports the seat.

Bellini's innovation lay in using zips to fasten the leather cover to its frame; a zip runs up the inside of each leg, securing the cover in place. Previously, zips had only been used for upholstered furniture. Bellini's decision to completely envelop the supporting structure lends the chair a unified appearance and enhances the quality of the natural leather.

### DIMENSIONS

52w x 49d x 45/82cmh

### MATERIALS

The 412 Cab chair has an enamelled steel frame with leather upholstery zipped over the frame. The seat is padded with polyurethane foam.

The upholstery consists of sixteen pieces of saddle leather.

Available in a selection of colours from the Cassina leather collection; see the downloadable sheet for details.
