

Chaise Tout Bois chair, 1941

Designer: **Jean Prouvé**

Manufacturer: **Vitra**

£819

DESCRIPTION

Chaise Tout Bois chair by **Jean Prouvé** for **Vitra**.

Chaise Tout Bois is a robust and well-designed chair constructed entirely out of wood. It is an evolution of the iconic Standard chair, but the Chaise replaced its metal legs with wood. The Second World War created a scarcity in metal, resulting in innovation and experimentation in wooden furniture.

The rear legs of the chair hold the majority of the weight of the user's body and it took a few prototypes until Prouvé could perfect the structural strength of the chair. In 1947, the Chaise Tout Bois won an award in the 'Meubles de France' competition for a visually attractive yet good quality chair that could be mass-produced at the time.

DIMENSIONS

46w x 49d x 46/80.5cmh

MATERIALS

Moulded plywood veneer in natural or dark-stained oak seat and backrest, protective natural lacquer finish.
Non-stackable solid wood base; same type of wood as backrest and seat in natural or dark-stained oak, protective natural lacquer finish.
