

## Cherner side chair, 1957

Designer: **Norman Cherner**

Manufacturer: **Cherner Chair Co**

£828

### DESCRIPTION

**Cherner side chair** by **Norman Cherner** for **Cherner Chair Co.**

Norman Cherner was an American designer notable for his pioneering work on prefabricated housing as well as his furniture designs. His moulded plywood chair displays considerable technical expertise and reflects the preoccupation with this material of his contemporaries Charles and Ray Eames.

Designed in 1958 and now reissued in exacting detail from the original drawings and moulds, the Cherner chair combines the best of both moulded plywood and solid bent wood construction.

This strong and lightweight moulded plywood side chair is the companion to the classic **Cherner armchair**. Please view the Cherner finishes pdf in the downloads section for more information on finishes.

### DIMENSIONS

47w x 53d x 45/80cmh

## MATERIALS

The seat is made of laminated plywood of graduated thickness, from 15 plys to 5 plys at the thin edge of the shell.

Available in natural beech, ebony lacquer (no grain), stella orange, white lacquer (no grain), classic walnut, classic ebony, natural walnut, red gum with beech legs, or rift cut white oak. Wooden legs.
