

Cloud

Designer: **Ronan and Erwan Bouroullec**

Manufacturer: **Cappellini**

£906

DESCRIPTION

Cloud modular bookcase by Ronan & Erwan Bouroullec for Cappellini.

Conceived by the French designers Ronan & Erwan Bouroullec in 2004, the Cloud bookshelf is a statement shelving unit with an exceptional design. Manufactured using rotational moulding technology, multiple elements can be combined using clips, allowing the shelf to be personalised to its space.

The extravagant bookshelf adds a sculptural element to its environment with its beehive structure. Its two-sided design allows light to pass through it and can also be used as a practical room divider.

Please note: Shown on the pictures are modules joined together; price shown is for a single module.

DIMENSIONS

187.5w x 44.5d x 104cmh

MATERIALS

Double-faced modular bookcase made from white plastic.
