

## In The Tube Pendant Light, Horizontal

Designer: **GLP DPA**

Manufacturer: **DCW Editions**

£627

### DESCRIPTION

**In The Tube Pendant** by **Dominique Perrault and Gaëlle Lauriot-Prévost** for **DCW éditions**.

Inspired by the industrial striplights commonly found in French power stations, In The Tube pendant is a decorative and highly flexible pendant light. Designed in 2017, the light can be hung vertically on a single wire, or horizontally on two wires.

A choice of the reflector allows control over the colour of the light. The reflector sits behind the bulbs and is available in two finishes: silver and gold. Silver emits the coolest light, whilst gold emits the warmest.

An optional mesh is available to further diffuse the light. The mesh sits inside the tube around each bulb and is available in silver or gold.

Contact our shop or showroom to order an outdoor version, which includes a connection box.

### DIMENSIONS

Small: 12.5dia x 37cmd  
Medium: 12.5dia x 52cmd  
Large: 14.5dia x 72cmd  
Extra large: 14.5dia x 132cmd

## MATERIALS

A borosilicate glass tube houses the LED filament bulbs in a linear formation.

Stainless steel collars and black aluminium stoppers sealed with silicone ensure the light is entirely water and weather-resistant.

With optional silver or gold mesh finish.

Recommended light source (not included):

Small and medium: 2 x E14 LED 6W Max.

Large: 4 x E27 6W Max.

Extra large: 6 x E27 23W Max.
