

In The Tube 360° Wall Light

Designer: **GLP DPA**

Manufacturer: **DCW Editions**

£340

DESCRIPTION

In The Tube 360° Wall Light by **Gaëlle Lauriot-Prévost & Dominique Perrault** for **DCW éditions**.

Designed in 2017, the In The Tube 360° is a decorative and highly flexible wall or ceiling light featuring innovative LED technology to deliver 360° light emission.

Inspired by the industrial striplights commonly found in French power stations, a borosilicate glass tube houses an LED strip inside a frosted diffuser. Stainless steel mountings and aluminium stoppers sealed with silicon ensure the light is entirely water and weather-resistant, making it suitable for use indoors and outdoors.

An optional flap can be mounted to the light and allows control over the orientation of the diffused light. The flap is available in two finishes: powder-coated black or white.

An optional mesh is available to further diffuse and add character to the light. The mesh sits within the glass tube and is available in silver or gold.

The outdoor option includes a connection box to protect the driver and wiring from water and humidity. This box can also be used to hide wiring when mounted indoors. To include a connection box in your order, please choose the

outdoor option.

An external device driver is supplied as standard. An optional ornamental cover plate is also available.

DIMENSIONS

Small: 7dia x 42cmh

Medium: 7dia x 72cmh

Large: 7dia x 102cmh

Extra large: 7dia x 162cmh

MATERIALS
