

ISP Wall Light

Designer: **Ilia Potemine**

Manufacturer: **DCW Editions**

£1,227

DESCRIPTION

ISP Wall Light by **Ilia Potemine** for **DCW éditions**.

Designed in 2017, the IPS wall is as much an object of beauty as it is a practical light for the home.

A translucent rod containing an LED light source glides from its brass enclosure, the intensity of the light determined by how much of the rod is revealed.

When the light is completely revealed, it diffuses a comfortable yet powerful light. When the light is slid further into the brass tube, the light takes on a warmer quality.

The ISP wall light can be positioned vertically or horizontally.

Light source: 8W integrated LED.

DIMENSIONS

8w x 12d x 37cmh

MATERIALS

Polished brass enclosure.

Open/close mechanism available in a left opening or right opening model. Also available in varnished version.
