

System Ultra Clothes Rack

Designer: **Poul Cadovius**

Manufacturer: **DK3**

£166

DESCRIPTION

System Ultra Clothes Rack by Poul Cadovius for DK3.

An evolution of Poul Cadovius's Royal Shelving System, the System Ultra was designed in 1957. It adheres to the same design principles, focusing on space efficiency by raising furniture from the floor to the wall.

The clothing rack allows you to utilise the system as an open wardrobe for the bedroom or as a convenient system to store your coats when entering the house.

Comprising wall-mounted rails, shelves, and hangers crafted from powder-coated steel, the System Ultra offers a range of colours and sizes for its components. This flexibility enables you to create your preferred configuration, allowing for easy expansion or reconfiguration.

If you require any assistance designing your shelving system please either **contact us** or use the System Ultra configurator **here**.

DIMENSIONS

68w cm

MATERIALS

Powder coated steel in black.
