

System Ultra, Configuration C

Designer: **Poul Cadovius**

Manufacturer: **DK3**

£1,867

DESCRIPTION

System Ultra, Configuration C by **Poul Cadovius** for **DK3**.

In 1957, Poul Cadovius unveiled the System Ultra, an evolution of his iconic Royal Shelving system. This storage solution optimises space by lifting furniture from the floor to the walls, resulting in a more spacious environment.

The system's distinctive feature lies in its slim shelves, featuring a refined wave-shaped edge profile. These shelves connect to the rails through hangers, providing options in brass, steel, or black.

This configuration includes three wall-mounted rails and eight shelves with a 22-inch diameter. You can customise the design by mixing and matching components for a contrasting style or opting for a unified appearance with fully matching wood options.

If you require any assistance designing your shelving system please either **contact us** or use the System Ultra configurator **here**.

DIMENSIONS

144w x 22d x 200cmh

3 x Rails: 3 x 1.9d x 200cmh

4 x Shelves (including hangers): 72w x 22d x 7cmh

MATERIALS

Wooden shelves made from moulded veneer in either oiled oak or oiled walnut.

Steel shelves available in either green or black.

Hangers available in brass, steel, or black.
