

System Ultra Rails

Designer: **Poul Cadovius**

Manufacturer: **DK3**

£150

DESCRIPTION

System Ultra Rails by **Poul Cadovius** for **DK3**.

Following the design of the iconic Royal Shelving system, Poul Cadovius created the System Ultra in 1957. It was developed as a space-saving storage solution, with the same innovative notion to move furniture from the floor and onto the walls to create a more spacious room.

The System Ultra comprises wooden wall-mounted rails, and powder-coated steel shelves and hangers. The slim shelves feature an elegant wave-shaped edge profile and attach to the rails with hangers in either brass or coloured steel.

The components are available in two different finishes and three different sizes, allowing flexibility to create your desired configuration and to expand or reconfigure in the future.

Shelves and hangers are sold separately **here**.

If you require any assistance designing your shelving system please either **contact us** or use the System Ultra configurator **here**.

DIMENSIONS

Rail 70 - 3w x 1.9d x 70cmh

Rail 100 - 3w x 1.9d x 100cmh

Rail 200 - 3w x 1.9d x 200cmh

MATERIALS
