

Skynest Motion

Designer: **Marcel Wanders**

Manufacturer: **Flos**

£3,720

DESCRIPTION

Skynest Motion by **Marcel Wanders** for **Flos**.

An innovative light with a silhouette redolent of a kinetic mobile, Marcel Wanders Skynest Motion is unique in that it is connected to both the floor and the ceiling.

The dome, suspended by a gently arched tube, is constructed from a network of tubular mesh made from recycled polyester, with each luminous element powered by a special micro-connector connected to the top. To ensure optimal light emission from the LED modules, these are always white when facing the inside of the dome.

Designed in 2023, the light emanated neither comes from a bulb nor an LED board but rather from the fabric, which has LED strips incorporated in the textiles structure.

Skynest Motion is constructed without any glue so that all parts can be detached and recycled at the end of their life.

DIMENSIONS

Dome: 90.4dia x 21.3cmh

Arch: 180cm

Cable: 600cm

MATERIALS

Made from nylon with glass fibre, recycled polyester, LATAMID and aluminium.

Light source (included): LED 57W 100-240/48V.

Integrated dimmer.

Integrated switch.
