

Skynest Suspension

Designer: **Marcel Wanders**

Manufacturer: **Flos**

£2,875

DESCRIPTION

Skynest Suspension by **Marcel Wanders** for **Flos**.

Released in 2022, Marcel Wanders Skynest Suspension is a technical, innovative light with a dramatic silhouette. What makes this pendant truly unique is that the light neither comes from a bulb nor an LED board but instead from the fabric, which has LED strips incorporated in the textiles structure.

The dome is constructed from a network of tubular mesh made from recycled polyester, with each luminous element powered by a special micro-connector connected to the top. To ensure optimal light emission from the LED modules, these are always white when facing the inside of the dome.

Skynest has a built-in balancing system and an aluminium ring at its base to keep the structure in place through a simple snap-fit design.

Skynest Suspension is constructed without any glue so that all parts can be detached and recycled at the end of their life.

DIMENSIONS

90.4dia x 21.3cmh

Cable: 270cm

MATERIALS

Made from nylon with glass fiber, recycled polyester, LATAMID and aluminum.

Light source (included): LLED 78W 1944lm 2700K CRI9.

Dimmable (0-10V / 1-10V / DALI / PUSH).
