DESCRIPTION

Luce Orizzontale by **Ronan and Erwan Bouroullec** for **Flos**.

Ronan & Erwan Bouroullec's Luce Orizzontale is a sculptural lamp that marries expert craftsmanship with cutting-edge technology to deliver a functional light with a poetic presence.

Comprising a modular structure of interlocking cylindrical glass, the elements are supported by a central polished aluminium bar with two integrated LED light sources inserted inside, one facing upwards and the other downwards.

The light can be easily controlled through a system located at the bar end, allowing you to turn the light on and off, adjust the intensity and control the upper and lower lights separately.

Luce Orizzontale is constructed without any glue so that all parts can be detached and recycled at the end of their life.
