

Ant Chair 3 Legs

Designer: **Arne Jacobsen**

Manufacturer: **Fritz Hansen**

£329

DESCRIPTION

3100 Ant Chair, 3 Legs by **Arne Jacobsen** for **Fritz Hansen**.

The classic Ant chair was originally designed by Arne Jacobsen in 1952 for the canteen at Novo Nordisk, a Danish healthcare company. The name of this design stems from the outline of the Ant chair, which resembles an ant with its head raised.

Arne Jacobsen designed the Ant chair to be light, stable and stackable. Originally the Ant chair had three plastic legs and a seat made from a laminated veneer. It is now available with steel legs and in both a three-legged and four-legged version.

DIMENSIONS

52w x 51d x 44/77cmh

MATERIALS

The seat shell comes in natural veneer (10 clear lacquered wood types), coloured ash (with wood grain visible) or fully lacquered (where the wood grain is not visible).

Please see the pdf in Product Downloads to see all wood types and finishes available. Base in chromed steel. Stackable.

Please note: a wider selection of seat frame finishes are available, please contact our showroom for more information.
