Rocking Horse by Fritz Hansen.

Discovered through two archival photographs of a moulded veneer prototype from 1946, the original Rocking Horse was documented by Fritz Hansen for its remarkable craftsmanship.

Unlike a traditional rocking horse, the rocking function of the Fritz Hansen Rocking Horse is embedded in the body, contributing to its sculptural expression and abstract form.

Rocking Horse has been meticulously recrafted for production, with its sculptural form now standing as a symbol of the heritage, innovation and craftsmanship that embodies Fritz Hansen.
