DESCRIPTION

Modern Line sofa by **Greta Grossman** for **Gubi**.

Greta M. Grossman (1906-1999) was a Swedish designer and architect who emigrated to the USA in the 1940s. An enthusiastic proponent of European modernism, Grossman played a significant role in defining the aesthetic of the mid-century Californian design. Today, her designs are highly collectable and much sought after, and are noted for their lightness of form and elegant lines.

Designed in 1949, the Modern Line sofa collection bears all the hallmarks of Grossman's sophisticated minimalism, and was particularly praised for being representative of her roots in Scandinavian design. Grossman herself noted that the design evolved "out of our own preference for living in a modern way."

Modern Line was also a pioneering product in terms of its use of new materials and technology, taking advantage of industrialised upholstery methods and championing the use of Nozag springs.
