

Bog Myrtle incense cones

Manufacturer: **Hæckels**

£16

DESCRIPTION

Bog Myrtle incense cones by Hæckels

Founded in 2012 with a mission to promote healthy and ethical products, Hæckels create simple, handcrafted products inspired by and made from natural ingredients harvested on the Kent coastline.

The Bog Myrtle incense cones give off a clove-like aroma which complements other floral scents. Made from natural Myrica Gale oil, the incense is an effective insect repellent. The burn time of each cone is about 15 minutes, the scent remaining in a mid-sized room for 2-4 hours.

Simply light the tip of the incense for 15 seconds, softly blowing the ember until red hot. Allow the fragrance to disperse through the room.

These can be burnt on the metal lid of the tin or can be used with the **Hæckels incense burner** for an elegant and convenient way to burn your incense.

Tin contains 20 cones.

MATERIALS

Made from natural Myrica Gale oil.
