

CPH30 Copenhagen Extendable Leaf

£219

DESCRIPTION

CPH30 Copenhagen extendable leaf by **Ronan + Erwan Bouroullec** for **HAY**.

The CPH30 Copenhagen extendable leaf for the CPH30 extendable table allows for an extendable design which sets it apart. This additional extension leaf can be placed into the table's central sliding mechanism.

Copenhagen is a collection of furniture designed by Ronan and Erwan Bouroullec for the redesigned University of Copenhagen (KUA). The collection includes a wooden chair, a bar stool and several tables.

The starting point for this series was an old university chair - architect Bernt Pedersen's trestle chair. This chair is a simple and beautiful chair with an uncomplicated identity. The Bouroullec interpretation has upheld the original chair typology (trestle chair) and sought to maintain the compelling simplicity of the original chair.

The aim was to create a range of educational furniture which in form and identity has a clear dating and which in a compelling manner uncovers the current functional needs of a university. It has also been the aspiration to distance the collection from the slightly institutional expression of the original chair and create furniture with greater originality and a more domestic expression.

Please see product range below for more information on the **CPH30 extendable table**.

DIMENSIONS

50w x 80d

50w x 90d

MATERIALS

The leaves are made in plywood with a laminate or linoleum surface and are available in two different sizes.
