

Boa Table, Extra Large

Designer: **Stefan Diez**

Manufacturer: **HAY**

~~Was £3,888~~ Now £3,304

DESCRIPTION

Boa Table, Extra Large by **Stefan Diez** for **HAY**.

Taking inspiration from the timeless artistry of Japanese bamboo crafting, the Boa Table designed by Stefan Diez reimagines the conventional conference table with a modern twist. Crafted from Hydro CIRCAL aluminium, an environmentally-conscious material composed of a minimum of 75% recycled post-consumer scrap, the table's tubular frame is meticulously shaped through extrusion in Denmark, powered by renewable energy sources. This innovative approach yields flexible industrial aluminium profiles skillfully bent into form during assembly, resulting in a lithe, adaptable solution that can be conveniently flat-packed.

Customizability is a key feature of the Boa Table, with various tabletop options including linoleum, laminate, wood, or glass. The table frames come in a variety of sizes and colours, allowing for tailored selections. To enhance its utility, the Boa Table can be supplemented with a supplementary power supply and cable storage accessories, catering to a broad spectrum of professional environments. Please enquire about more custom options.

Please note that the table is the standard version and does not come with power access modules. Please enquire if interested.
