DESCRIPTION

Boa Table | Medium by **Stefan Diez** for **HAY**.

Drawing inspiration from the timeless craftsmanship found in Japanese bamboo artistry, the Boa Table, conceived by Stefan Diez, revolutionizes the traditional conference table into a contemporary marvel. Meticulously crafted using Hydro CIRCAL aluminium, a material rooted in eco-consciousness that incorporates a minimum of 75% recycled post-consumer scrap, the table's tubular frame undergoes precision shaping through extrusion in Denmark, a process fueled by sustainable energy sources. This innovative methodology produces versatile industrial aluminium profiles, skillfully moulded into shape during assembly, resulting in a sleek, adaptable solution that can be conveniently flat-packed.

At the heart of the Boa Table lies its design diversity, epitomized by an array of customizable tabletop options ranging from linoleum, laminate, and wood, to glass. The table frames are available in a spectrum of sizes and colours, allowing for personalized selections.

Elevating its functionality, the Boa Table offers the possibility of integrating supplementary power outlets and cable storage accessories, catering comprehensively to a diverse range of professional settings.

Please note that the table is the standard version and does not come with power access modules. Please enquire if interested.

DIMENSIONS
