

Boreale Vase

Manufacturer: **Ichendorf Milano**

£77

DESCRIPTION

Boreale Vase by **Lina Obregón** for **Ichendorf Milano**.

The Boreale vase collection, created by designer Lina Obregón and crafted from hand-moulded borosilicate glass, features colourful overlapping cylinders that evoke the feeling of a festive sky full of fireworks. The central cylinder is perfect for holding taller flowers, while the other cylinder wraps around it - akin to the paper wrapping of a bouquet.

With its double vase design, this collection offers endless possibilities for creative floral arrangements, adding style and functionality to any space. The collection includes three unique vases in different colour pairings.
