

Mixed Weave Tray Box

Designer: **Kevin Stamper**

£108

DESCRIPTION

Mixed Weave Tray Box by **Kevin Stamper**.

Established in the early 1990s as a manufacturer of one-off furniture pieces, Kevin Stamper has since shifted his focus to primarily producing smaller items such as decorative wooden boxes.

He has developed a unique technique of hand-dying wood veneer that enables the dye to penetrate wholly through the surface, meaning there is no loss of colour when the material is sanded back.

When finished with a lacquer, these colours adopt a bright, deep tone that cannot typically be attained using regular dyed veneers.

The Mixed Weave Tray box is a charming storage box that employs these techniques. Ideal for storing jewellery and precious keepsakes, the charming box makes for a great addition to any space.

DIMENSIONS

12w x 8d x 5cmh

MATERIALS

The box is crafted from solid fumed oak, whilst the veneers on the lid are fumed oak and hand-dyed sycamore.
