

## Aluminium chair, 2018

Designer: **Marc Newson**

Manufacturer: **Knoll**

£1,992

## DESCRIPTION

**Aluminium chair** by **Marc Newson** for **Knoll**.

Paying tribute to the Mies van der Rohe's 1928 Tugendhat Chair and Brno Chair, the Newson Aluminium chair employs reverse cantilever design with modern material. The design evokes visual weightlessness and renders an incredibly simple profile. The seat floats effortlessly and is secured to the back via the legs.

The chair features an aluminium main-frame allowing for a more dynamic form factor. The two end caps connect to create an effortless, yet structurally strong structure. The engineering complexity is made invisible through mechanical precision and streamlined design.

## DIMENSIONS

Armless: 57w x 60.5d x 46/84cmh

Arm: 64.5w x 60.5d x 46/84cmh

## MATERIALS

The chair will be available with or without arms, in black frame paints and black mesh

Mesh seat and back are knitted using two components: polyester yarn, which adds colour and a soft hand, along with thermoplastic elastomer which provides the structural element
