

## Red Baron Bookshelf

Designer: **Piero Lissoni**

Manufacturer: **Knoll**

£7,692

## DESCRIPTION

**Red Baron bookshelf** by **Piero Lissoni** for **Knoll**.

Designed by Piero Lissoni in 2018, Red Baron is a modular bookshelf with a focus on material quality and personalized configuration for an individual touch and look, created to house and showcase your book and art collections.

Inspired by an aeroplane wing's details, the Red Baron bookshelf combines parts that gradually become lighter, narrowing into a thin sheet of metal rendered refined by the almost invisible thickness and the finish itself.

Describing the bookshelf, Piero Lissoni says *"Our reasoning focused on triplanes, on how the wings of airplanes are supported. Continuing to remove material, the quintessence of the design emerged: a very slender sheet of aluminium with vertical struts. Just like a triplane."*

Available in 4 different sizes, the look of the bookshelf can be altered to suit either residential or workspace environments.

## DIMENSIONS

200w x 45d x 160cmh

300w x 45d x 160cmh

200w x 45d x 240cmh

300w x 45d x 240cmh

## MATERIALS

The support structure is made with steel posts clad in anodised extruded aluminium, while the shelves have a refined aluminium finish. The parts allow for compositions of different heights and lengths, using modules one meter in width and 45 cm in depth.

Anodized aluminium structure and shelves, back and side panels in clear glass
