

## Platner Gold Lounge Chair

Designer: **Warren Platner**

Manufacturer: **Knoll**

£7,848

### DESCRIPTION

**Platner Gold lounge chair by Warren Platner for Knoll.**

To celebrate its 50th anniversary the Platner collection is now available in an 18K gold-plated finish.

Warren Platner designed the Platner Collection in 1966, and his intention was for it to be gold-plated. The technology of the time made gold plating in large-scale production impossible, however, which resulted in the collection being made in nickel-plated steel. 50 years later, the Platner Collection Gold fulfils Platner's original wish.

**Please note: When upholstered in Eva fabric collection, there will be a lead time of 12-14 weeks.**

### DIMENSIONS

95w x 65d x 48/77cmh

### MATERIALS

The Platner lounge chair is made up of hundreds of individual welds that have been soldered by hand. The frame is made from vertical steel wire rods welded to a round and edge-framing rod. A clear plastic extrusion ring creates a smooth bottom surface. 18K gold-plated finish, coated with clear lacquer for protection. Upholstered in fabrics of the collection.
