

Tia Pendant Light

Designer: **Foster and Partners**

Manufacturer: **Lumina Italia**

£1,414

DESCRIPTION

Tia Pendant Light by **Foster + Partners** for **Lumina Italia**.

Tia 400 and 600 are the latest additions to the Lumina Tia collection. These exquisite fixtures boast intricately designed painted aluminium lampshades, a unique dissipation system, and a distinctive photo-etched filter situated at the base.

The design of Tia incorporates sleek, contemporary lines that integrate innovative solutions. This is achieved through the meticulous selection of materials and the utilization of cutting-edge technologies.

These pendant lamps are equipped with a meticulously crafted reflector plate, handcrafted in Italy and internally coated with Lumina's signature paint. Additionally, they feature a CNC-turned aluminium central cover, which not only supports the lampshade but also houses the optical and dissipation systems. To safeguard the optics, a glass enclosure, expertly moulded in Italy, provides protection.

Tia's illumination emanates from a state-of-the-art COB LED with an exceptional colour rendering index (CRI 97). Through a meticulously engineered process, these fixtures deliver a comfortable, glare-free luminous flux, allowing users to fully appreciate Tia's radiant light.

DIMENSIONS

Tia 400:

Base: 17.5dia x 6cmh

Shade: 40dia

maximum drop: 3m

Tia 600:

Base: 17.5dia x 6cmh

Shade: 60dia

maximum drop: 3m

Please refer to the product specification in the Product Downloads area for more details.

MATERIALS

Available in the following colours:

Ultra Matt White

Matt Black

Saphirre Blue

Battersea Green

Oxygen Red Soft-Touch

Metallic Bronze

Matt Brushed Aluminium

Light source:

Tia 400:

18W LED

On-off, push dim, 1-10V, DALI, 2700K or 3000K

Tia 600:

25W LED

On-off, push dim, 1-10V, DALI, 2700K or 3000K

Note:

A 2700K light emits a cosy, yellow-toned glow, while a 3000K light provides a crisp, white light. The 3000K lighting is ideal for lively spaces such as home offices, hallways, bathrooms, and kitchens.

The 2700K lights are better suited for areas where a warm and relaxing ambiance is desired, like the living room, dining room, and bedroom.
