

Daphine Table Lamp

Designer: **Tommaso Cimini**

Manufacturer: **Lumina Italia**

£661

DESCRIPTION

Daphine Table Lamp by **Tommaso Cimini** for **Lumina Italia**.

The Daphine Table Lamp epitomizes Lumina's core essence. Its genesis is a brilliantly uncomplicated yet highly effective concept: a swivelling diffuser, a flexible arm consisting of two segments, and an electromechanical transformer atop a cylindrical base flanked by metallic caps. The lamp was first created in 1975 by Tommaso Cimini, in his modest workshop in Sedriano (Milan province), utilizing machines meticulously retrofitted for this very purpose.

The idea behind the design can be traced back to Tommaso Cimini's design philosophy—"Lots of light, not much lamp"—a principle that remains at the heart of all products bearing Lumina's prestigious name.

With a rich history of production and widespread application, the Daphine lamp has proven its versatility in an array of public and private settings. From adorning reading desks in libraries and enhancing the ambience of pianos to gracing jewellery display counters and prestigious fashion brand storefronts, the Daphine lamp has demonstrated its adaptability.

Undoubtedly, the Daphne stands as a 'lighting design icon,' a distinction it has earned over the years. Its presence in esteemed collections across the globe, including those of prominent design and contemporary art museums like the Brooklyn Museum and Judd Foundation in New York, the Musée des Arts Décoratifs in Paris, the Neue Sammlung in Munich, and the Triennale in Milan, further solidifies its iconic status.

DIMENSIONS

Base: 11dia x 10cmh

Arms: 35cm/40cm

Please refer to the product specification in the Product Downloads area for more details.

MATERIALS

Available in the following colours:

Black Soft-Touch

Black Classic

Matt Red

Matt White

Matt Yellow

Metallic Bronze

Brushed Nickel

Yellow Gold Brushed

Light source:

9W LED, 2700K or 3000K

Dimming:

2-step or continuous dimming

(settable on the base)

Note:

A 2700K light emits a cosy, yellow-toned glow, while a 3000K light provides a crisp, white light. The 3000K lighting is ideal for lively spaces such as home offices, hallways, bathrooms, and kitchens.

The 2700K lights are better suited for areas where a warm and relaxing ambiance is desired, like the living room, dining room, and bedroom.
