DESCRIPTION

Milana Pendant by **Jaume Ramírez** for **Marset**.

Create a dynamic lighting system in your interior through Jaume Ramírez's unique, pragmatic design. The pendant can be reconfigured through modular sections to give the user control over the light, offering endless possibilities to create custom compositions.

The design breaks down the traditional lamp archetype, starting with only a cylindrical body with a built-in LED. Different conical shades can be added in black or oyster white, and each lamp can have a simple counterweight that enables movement when hung between two points.

An almost invisible lens covers the LED and distributes the light. Milana provides a strong downward light when using only the cylindrical lamp, and when adding a shade, the light illuminates the lamp itself.
