

Zenc pendant light, 2022

Designer: **Joan Gaspar**

Manufacturer: **Marset**

£337

DESCRIPTION

Zenc pendant light by **Joan Gaspar** for **Marset**.

During a trip to New York, Joan Gaspar noticed a unique feature that constitutes the city's skyline; the water tanks on top of the rooftops. Using this as his inspiration, Gaspar developed Zenc, a series of cylindrical pendants complete with a coned roof.

The lights, constructed from rotomoulded bi-layer polyethylene, appear to be made of zinc, a metal traditionally used for storage tanks. The inside is coated in a white layer, creating a contrast, and driving the light to bounce and catch the eye.

It is available in six different calming colours: white, grey, red, sky blue, pale pink and pale yellow.

DIMENSIONS

Shade: 44dia x 28cmh

Cable length: 250cm

Rose: 11dia x 3.5cmh

MATERIALS

Bi-injected rotary moulded polyethylene.

Recommended light source: E27 Globe 12W.
