

Lightwood Armchair | Webbed Seat

Designer: **Jasper Morrison**

Manufacturer: **Maruni**

£674.17

DESCRIPTION

Lightwood Armchair | Webbed Seat by **Jasper Morrison** for **Maruni**.

Designed in 2011, Lightwood is one of Jasper Morrison's first projects designed while living in Japan. Inspired by the ability of Japanese architects and designers to make things light in appearance, Morrison combined with the expert wood craftsmanship of Maruni's to achieve the light wooden structure and visual transparency.

The versatile lightwood armchair is offered in a choice of fabric options, the webbed seat provides an interesting contrast with the inherently solid wood frame. See 'product range' below for the various seat solutions available.

DIMENSIONS

52w x 47.8d x 45/79.8cmh

MATERIALS

The wood used in this product is obtained from maple, oak or ash trees in North America that are managed and felled in a planned manner.

All woods are available in either a clear or natural black urethane finish. Oak is also available with a whitish urethane finish.

The paints, adhesives and plywood used here suppress VOC emissions in manufacturing processes and finished products.

The seat is made from a synthetic webbing in a selection of colours.

Also available with a mesh or cushioned seat - see 'More products in this range' below.
