

T bar stool, 2016

Designer: **Jasper Morrison**

Manufacturer: **Maruni**

£1,008

DESCRIPTION

T bar stool by **Jasper Morrison** for **Maruni**.

Launched at the Milan Furniture Fair in 2016, the T bar stool adds to the existing family of furniture Jasper Morrison has already designed for Japanese manufacturers Maruni.

The T bar stool makes optimum use of 3D wood machining technology, with a chair seat, legs and backrest shaped from clear urethane-coated solid maple or oak wood, or with a whitish urethane-coated ash wood. A coloured strip of sprung steel connects seat and backrest, providing a degree of movement that enhances comfort. The steel also offers a fresh contrast with the wood.

Available in two heights: medium and high.

DIMENSIONS

Medium: 44w x 45d x 64/91.5cmh

High: 47w x 48d x 78/105.5cmh

MATERIALS

Stool seat, legs, and backrest are made of solid maple, oak or ash with clear or whitish urethane varnish coating.

The wood used in this product is obtained from maple, oak or ash trees in North America that are managed and felled in a planned manner.

See downloadable spec sheet for details on wood finishes.

Central strut supporting backrest made of steel powder-coated in black, green or red.

The coating and glue used here reduce VOC emissions in manufacturing processes and finished products.
