

MC23 OTO Two-Level Console

Designer: **Studio Æ**

Manufacturer: **Mattiazzi**

£794

DESCRIPTION

MC23 OTO Two-Level Console by **Studio Æ** for **Mattiazzi**.

The 2023 MC23 OTO range from Mattiazzi is designed by the Berlin-based Studio Æ. OTO is a collection of four slightly different models inspired by architectural elements. All four follow the same construction principle but differ in their proportions. The collection features a bench, a side table and two slim consoles of different heights. The slim consoles are great for narrow hallways.

The design features an organic curve where the vertical and the horizontal element of the furniture meet, elevating the design further. A custom-made milling tool is used to inscribe the sculptural rounding of the inner edges into the beams.

Made from Okoumé of African origin sourced from responsible forestry, the console is available in four different finishes.

DIMENSIONS

90w x 18d x 45/83cmh

MATERIALS

Okoumé of African origin sourced from responsible forestry.
