MATERIALS

Made 100% from recycled PET.

Material produced through the process of recovery and reuse of polyethylene (PET) waste, from which a lightweight fiber is obtained. Recycled PET presents a high resistance to wear and offers good thermal properties, which makes it a perfect fiber for outdoor rugs.

The environmental benefits of this process are countless: it reduces environmental impact, avoids the use of non-renewable natural resources and reduces energy consumption.

Cleaning advice:

Cannot be dry cleaned

Hose down and dry afterwards vertically

Do not use bleach

Vacuum frequently

Clean any stains with the appropriate solution before they dry.

Take the rug to specialized dry cleaners, if necessary.
