

Applique Radieuse

Designer: **Le Corbusier**

Manufacturer: **Nemo Lighting**

£431

DESCRIPTION

Applique Radieuse by **Le Corbusier** for **Nemo Lighting**.

Designed by Le Corbusier in 1949 to sit in the entrances of the Unité d'Habitation in Marseille, the Applique Radieuse is a thoughtfully designed wall lamp with a convex shape. The curved metal frame of the light provides maximum efficiency whilst also hiding the light source, offering a functional, minimalist look for your space.

The Unité d'Habitation is an iconic housing unit designed by Le Corbusier in collaboration with the painter-architect Nadir Afonso. It has served as the foundation of several housing developments throughout Europe and has become a symbol of the Modern Movement.

The lamp can be adjusted to emit a downlight for direct light or uplight for diffused light, allowing the user to personalise it to their space. It is also available in a selection of colours taken from the Unité d'Habitation, the iconic building designed by Le Corbusier: red, blue, white, orange and green.

DIMENSIONS

33.4w x1 3.2d x 13.4cmh
