

Lampe Cabanon

Designer: **Le Corbusier**

Manufacturer: **Nemo Lighting**

£447

DESCRIPTION

Lampe Cabanon by **Le Corbusier** for **Nemo Lighting**.

In 1952, Le Corbusier designed the Lampe Cabanon while residing on the French Riviera. The project was executed following the rules of the Modulor, an architectural measurement system Le Corbusier devised based on human proportions.

The lampshade, fashioned from tracing paper used by the architect, was ingeniously crafted from a wartime relic - a mortar shell carrier discovered on French beaches. This lamp, the subject of numerous sketches and designs, symbolises renewal in the post-war era.

DIMENSIONS

21dia x 42mh

Cable length: 250cm

MATERIALS

Green painted tracing paper with black painted zinc.

Recommended light source: E27 A60 IP20 230V.
