DESCRIPTION

Atollo glass table lamps by Vico Magistretti for Oluce.

For many years now, Atollo has no longer been a lamp, or rather, it has no longer been just a lamp. It has become a myth, an icon: one of the best know symbols of Italian design worldwide, one of the very few products which people recognise and call with its own name.

Designed by Vico Magistretti in 1977, it was awarded the Compasso d'Oro in 1979 and became, since then, part of the permanent collections of the world's major museum of design, as well as part of the furniture of many homes of those who love and are able to select the things surrounding them.

Atollo's secret probably lies in the geometrical construction of its shapes: the cone on the cylinder and the hemisphere above all. A luminous sculpture from which nothing can be removed to which nothing can be added.
