

Butterfly Chair

Designer: **Lucian Ercolani**

Manufacturer: **Ercol**

£515

DESCRIPTION

Butterfly Chair by **Lucian Ercolani** for **Ercol**.

Launched in 1958, Ercol's extensive development work enabled bending of thick wood laminations to create the curves of the Butterfly chair.

The soft curves of this chair create an eye-catching design. The shape and inherent springiness of the bentwood make for a comfortable seat.

The Windsor wedge joint is a prominent feature of this chair. The leg goes right through the seat sitting flush with the surface, then a wedge is inserted into a slot in the leg to form a strong joint. This adds a beautiful design element.

The distinctive bent form is reminiscent of a butterfly's wings, hence the name.

DIMENSIONS

51w x 46d x 47/82cmh

MATERIALS

The Butterfly chair is constructed using ash timber with ash veneer and is available in a range of finishes, please see the downloadable PDF.

Available for contracts purchase only.
