

Petit Standard Chair

Designer: **Daniel Rybakken**

Manufacturer: **HAY**

£324.17

DESCRIPTION

Petit Standard Chair by **Daniel Rybakken** for **HAY**.

The Petit Standard chair is the result of an 8-year design journey. Daniel Rybakken has created a chair with precision and considered details to create a stackable chair, where the stackable features will actually enhance the chair's design.

Petit Standard is an elegant yet functional chair and an icon of design. It uses die-cast aluminium and steel tubes that combine to create a three-dimensional triangle at the back of the chair. The strong, lightweight and geometric frame is counterbalanced by the warmth and natural quality of the oak veneer seat and backrest which both incorporate soft curves into the design as well as great comfort.

This chair is ideal for professional, educational and private environments thanks to its stackability and durability.

Please note: This chair has a minimum order quantity of two chairs in the same finish.

DIMENSIONS

52.5w x 50d x 47/83cmh
Stackable up to 12 pieces.

MATERIALS

Seat and back in FSC moulded plywood with inner veneer in beech and top and bottom veneer in water-based lacquered oak in various colours.

Base made from powder coated steel in matching colour.

The low VOC (volatile organic compounds) content in the water-based variant emits significantly fewer pollutants, which makes it much more environmentally friendly, contributing to a healthier working environment and better indoor climate. Furthermore, water-based lacquer is often more durable than PU lacquer, so your wooden furniture can have a longer lifetime too.
