

Jiro Dining Chair

Designer: **John Tree**

Manufacturer: **Resident**

£720

DESCRIPTION

Jiro Dining Chair by **John Tree** for **Resident**.

John Tree has expanded his celebrated Jiro range to include a dining chair that echoes the original seat's design principles and material palette.

When initially designing the range, Tree set out to refine a chair to its essential components, ensuring each part works to offer responsive support. The chair features a dynamic back and a sculpted ergonomic seat, providing comfort for long periods of sitting.

The sturdy steel base of the new dining model makes it ideal for high-performance use in commercial and residential dining environments.

Tree chose plywood for the construction of this seat, a natural material that can be freely shaped during the technical process.

DIMENSIONS

47w x 50.5d x 46/75.5cmh

MATERIALS

Aluminium legs with seat in plywood and oak veneer.

Stackable up to 6 chairs.
