

## Jiro Dining Chair, Upholstered

Designer: **John Tree**

Manufacturer: **Resident**

£796

### DESCRIPTION

**Jiro Dining Chair, Upholstered** by **John Tree** for **Resident**.

John Tree has expanded his celebrated Jiro range by introducing a new dining chair that follows the original seat's design principles and material palette.

When developing the Jiro range, Tree's main focus was to create a functional and essential chair, with every part of it contributing towards providing optimal support. The dining chair has a dynamic backrest and a sculpted, ergonomic seat, which makes it comfortable to sit on for extended periods.

The chair's sturdy steel base is also perfect for high-performance use in residential and commercial dining setups.

Tree chose plywood as the primary material for constructing the chair as it is natural and can be easily shaped during the technical process.

### DIMENSIONS

47w x 50.5d x 46/75.5cmh

## MATERIALS

Aluminium legs with seat in plywood and oak veneer.
